SUBJECT INDEX TO VOLUME 33, 1987

[A]

Acidiphilium cryptum 11
acidogenic metabolism 463
acidophilic heterotrophic bacteria 11
adaptation 113
aerobic batch growth 113
Aeromonas hydrophila 497
affinity chromatography 409
Alcaligenes sp. 93
algae in sugar refinery wastewater 331
Ambrosiozyma-Hormoascus-Hyphopichia .. 231
ammonia assimilation 429
ammonium uptake 311
Anabaena cylindrica 311
Anabaena doliolum 471
Anacystis nidulans 471
anaerobic energetics 463

[B]

Bacillus cereus 27
Bacillus licheniformis 355
Bacillus polymyxa 93
Bacillus subtilis 409
Bacillus thuringiensis 459
Bacteroides fragilis group 429
ballistosporous yeasts 343, 445
ballistosporous yeasts in *Miscanthus sinensis* 177
basidiomycetous yeasts 57
biochemical and molecular characters 231
biomethanation of H_2 and CO_2 401
black yeasts 197
Bullera variabilis sp. n. 343
butyric acid fermentation 463

[C]

Candida dulciaminis 1
Candida floricola 1
Candida glucosophila 1
Candida parapsilosis 299
Candida solicola n. sp. 275
Candida soli n. sp. 275
Candida hinoensis n. sp. 275
Candida vaccinii 1
catalase 27
cell cycle control 437
cell-wall type 507
cellular fatty acid composition 135
characterization of *Hyphomicrobium* species 521
chemotaxonomy 197
chemotaxonomy of yeasts 75
classification of *Myxococcus* 247
clupeine sulfate, effect on membrane structure 489
clupeine sulfate, interaction with membrane 481
clupeine sulfate, interaction with phospholipid 481
clupeine sulfate, mode of action 481, 489
clupeine sulfate, stimulation of ATPase .. 489
coenzyme Q system 381
C_1-compound utilizing bacteria 135
Cryptococcaceae 75
Cyanobacteria 471

[D]

dealkaline lignin 247
dipcolinic acid 27
dissolved oxygen concentration 391
DNA base composition 445
DNA base composition of spore-forming lactic acid bacteria 47
DNA-DNA homology of basidiomycetous yeasts 57
DNA-DNA homology of spore-forming lactic acid bacteria 47
DNA homology 299
DNA homology of *Acinetobacter* 371

[E]

eelgrass (*Zostera marina*) 321
elemental sulfur oxidation 123
enzyme patterns, of fission yeasts 363
ethanol fermentation 421
ethanol inhibition kinetics 421
ethanol-using yeasts 275
Eubacterium limosum 463

[F]

fission yeasts, enzyme patterns of 363
forespore 27

[G]

gene expression 355

genetic relatedness of basidiomycetous yeasts 57
glucose uptake in *Chlorella* sp. 331
glutamate dehydrogenase 429
glutamate synthase 429
glutamine synthetase 267, 429

[H]

Halomethanococcus doii 303
halophilic, methanogenic bacterium 303
Hasegawaea gen. nov. 295
Hasegawaea japonica comb. nov. 295
Hasegawaea japonica, enzyme patterns of .. 363
Hasegawaea japonica var. *versatilis* comb. nov. 547
heterotrophic potential of algae 331
hot spring 123, 391
HPLC 381
hydroxy fatty acid composition 135
Hyphomicroboium methylovorum 521
Hyphomicroboim vulgare 521
Hyphomonas and *Rhodomicrobium* 521

[I]

identification of yeasts isolated in Thailand 205
impact of heavy metals on *Nostoc* 87
influence of redox potential on biomethanation of H_2 and CO_2 401
inoculum preparation 113
isolation and identification 247

[K]

KS5 medium 497

[L]

Lactobacillus acidophilus 287
Leucosporidium frigidum 455
Leucosporidium, the Q_8-equipped species of 455
Lodderomyces elongisporus 299

[M]

major components of the CoQ system 381
mating hormone 437
membrane-bound enzymes 409
methane production from H_2 and CO_2 by *Methanobacterium thermoautotrophicum* 401
methane-utilizing bacteria 135
methanogenic bacterium 303
methanol accumulation by *Methylosinus trichosporium* 221
methanol oxidation in *Methylosinus trichosporium* 221
methylamine-utilizing bacteria 135
Methylosinus trichosporium, methanol accumulation 221
minor components of the CoQ system 381
mitochondria membrane potential 543
mosquitocidal protein 459
Mrakia frigida comb. nov. 455
Mrakia gen. nov. 455
myxobacteria 247
Myxococcus flavescens sp. nov. 247

[N]

Neurospora crassa 543
nitrogen-fixation 93
nitrogen-fixing bacteria 321
new species of ballistosporous yeasts 167
new species of *Candida* 1
new yeast 445
new yeast anamorph genus 75
nitrogenase synthesis 93
numerical taxonomy of spore-forming lactic acid bacteria 33

[O]

obligate, halophilic methanogen 303
Octosporomyces octosporus, classification of 295
Octosporomyces octosporus, enzyme patterns of 363

[P]

parasporal inclusion 459
peroxidase 27
Phaeococcomyces and the related genera 197
phylogenetic lines 231
Pichia galeiformis n. sp. 275
pleoanamorphy 197
Plesiomonas shigelloides 497
potassium efflux 311
Promicromonospora citrea 507
Promicromonospora enterophila 507
Promicromonospora sukumoe sp. nov. 507
Pterocarpus indicus Willd 241

[R]

radiation-resistant *Acinetobacter* 371
recombinant *E. coli* clones 409

Rhizobium 267
Rhodosporidium 57
Rhodosporidium toruloides 437
Rhodotorula 57
root nodule morphology-bacteroid 241
roughage and concentrate 99
rumen bacteria 99

[S]

Saccharomyces carlsbergensis 421
Saccharomyces cerevisiae 113
Saitoella complicata sp. nov. 75
Saitoella gen. nov. 75
Schizosaccharomyces japonicus, classification of 295
Schizosaccharomyces japonicus var. *versatilis* 547
Schizosaccharomyces pombe, classification of 295
Schizosaccharomyces pombe, enzyme patterns of 363
serine proteinase 377
sexual differentiation 437
soil actinomycetes 507
spore-forming lactic acid bacteria 33, 47
Sporobolomyces griseoflavus sp. nov. 167
Sporobolomyces miscanthi sp. nov. 177
Sporobolomyces sasicola sp. nov. 167
Sporobolomyces subroseus sp. nov. 177
Sporobolomyces weijmanii sp. nov. 177
Sporobolomyces yamatoanus sp. n. 445
Sporolactobacillus inulinus 33, 47
sporulation 27
Streptococcus lactis 287
sulfide oxidation 123
sulfur oxidation 391
sulfur-oxidizing bacteria 123, 391
sulfur-turf 123, 391
synergism 459

[T]

taxonomy 231
taxonomy of spore-forming lactic acid bacteria 47
taxonomy of yeasts 381
tilapia culture pond 497

[U]

ubiquinone-9 445
ubiquinone systems in black yeasts 197
urea uptake 471

[V]

Vibrio 321
volatile fatty acids 99

[X]

xylosidase 409

[Y]

yeast 113
yeast-like fungi 231
yeast flora in fermented foods in Thailand 205
